

Experience

- Mindbody Senior Software Engineer, Payments, 2024 – Present.**
- Maintained .NET Core microservices for financial tasks and integrations with Stripe and Global Payments.
 - Led Kubernetes capacity planning during high season for the payments team.
 - Maintained a React-based financial admin platform used by 1,000+ payment specialists.
 - Led Payments PCI initiative, ensuring code integrity.
 - Coached and mentored engineers, enhancing team capabilities.
 - Participated in the on-call rotation.
- Telnyx Software Engineer II, Finance Systems, 2023 – 2024.**
- Built RabbitMQ producers and consumers in Python microservices within AWS Kubernetes.
 - Maintained FastAPI and legacy Python services processing \$10M/monthly transactions.
 - Participated in the on-call rotation.
- Microsoft Software Engineer II, Outlook Platform, 2021 – 2023.**
- Developed and maintained .NET backend services supporting Outlook (REST and gRPC).
 - Built an asynchronous .NET assistant running daily for all Outlook mailboxes.
 - Created and maintained diagnostics tools in .NET and PowerShell for production issues.
 - Migrated the most-used Outlook service from .NET Framework to .NET Core.
 - Participated in the on-call rotation.
- Software Engineer, Commercial Software Engineering, 2019 – 2021.**
- Contributed to *aks-engine*, an open-source Go project for Azure Kubernetes Service deployments.
 - Developed a mandatory TypeScript library supporting organization-wide linting.
 - Designed and implemented a Go-based notification system for a large LATAM e-commerce.
 - Led deployment of a COVID-19 data API for a major health organization.
- Software Engineering Intern, Commercial Software Engineering, 2018 – 2019.**
- Created a TypeScript (Angular) web client for a machine learning platform used by 300 data scientists.
 - Developed REST APIs in Python, ASP.NET Core, and Java Spring.
 - Built a TypeScript (Angular) web client for a trading platform used by thousands of traders.
 - Designed distributed cloud applications using Azure, Terraform, Docker, and Kubernetes.
- CETAX AI Intern, 2017 – 2018.**
- Built Big Data, Machine Learning, and Artificial Intelligence applications using Python.
 - Introduced and promoted a code review culture.
- IBM Cloud Computing Researcher, 2015 – 2017.**
- Deployed and maintained Minicloud, a free OpenStack cloud for Unicamp students.
 - Developed PowerGraph, a Python server monitoring tool.
 - Interviewed and mentored new project members.
 - Developed OpenCL2CUDA, a Python converter from the OpenCL HPC library to CUDA.

Education

- 2014 – 2018 Universidade Estadual de Campinas, Computer Engineering.**
- Won 3rd place at Microsoft's Hack the Campus Hackathon with a university data chatbot.
 - Assisted and taught shell scripting and Linux courses at the Free Software Group.
 - Served as VP of the Computer Science and Engineering Student Union (1,000+ students).
 - Teaching assistant on Digital Circuits Subject. I applied the practical tests and helped students with questions.
 - Final thesis: Cloud platform for high processing computing workloads. Platform still in use at Unicamp.

Languages

Portuguese: Native **English:** Fluent **Spanish:** Intermediate **French:** Basic

Technical Skills

- Intermediate C/C++, Java, TypeScript, Docker, React
- Advanced Python, C#, Go, Shell Script, Git, GNU/Linux, AWS, Azure, Kubernetes, Terraform
